

REMEMBER THESE SIMPLE TIPS.....

PH Neutral Cleaner: \$26.20 (1 Litre) A general purpose everyday cleaner suitable for all surfaces.

Outdoor Cleaner: \$35.20 (1 Litre) Removes stubborn stains caused by trees or flowers from all natural and artificial stone surfaces.

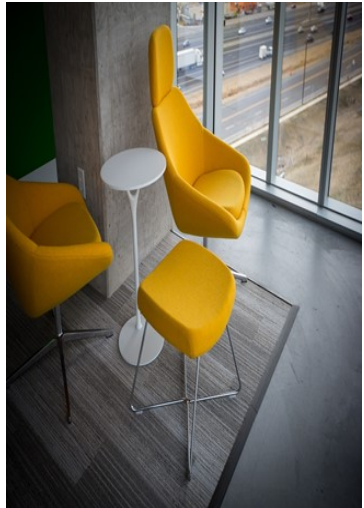

Active Clean: \$35.75 (1 Litre) A specialised cleaner to remove residues such as calcium, soap scum, rust, and greasy residues. Not for polished marble or limestone.

Tile and Grout Cleaner: \$22.80 (1 Litre) An everyday cleaner which rapidly lifts dirt, oil and grease from tile and grout

What not to do.....

- Never use ammonia, bleach, vinegar, hydrochloric acid, citrus or any other cleaners that are acidic or alkaline.
- Use only neutral PH cleaning products such as AOC PH Neutral Cleaner on your surfaces.
- Any rubber products such as rubber backed mats or rubber floor protectors will permanently mark the surface.
- Felt protectors on furniture will reduce scratching to the surface.

- Keep the floor free of any sand, grit or larger debris, as these can be abrasive to the surface.
- It is not recommended to use a vacuum cleaner on your floors as they can be abrasive to the surface.
- A clean microfibre dust mop is very effective at removing dirt on these surfaces.
- Do not use steam cleaners as they can trap dirt in these surfaces.
- Clean up all spills and semi solids as soon as possible. Some liquids (for example orange juice, urine, soft drinks, oil or wine) will stain your surface and need to be removed as quickly as possible
